- Extreme protection and durability**
Vinyl wear layer
- Dynamic colours and realistic decors**
High-definition printing for a realistic wood surface appearance and built-in unis for higher colour intensity
- Extreme performance and enhanced game experience**
NEW! Omnisports X3LT exclusive technology – Extreme 3 Layers Technology

KEY FEATURES

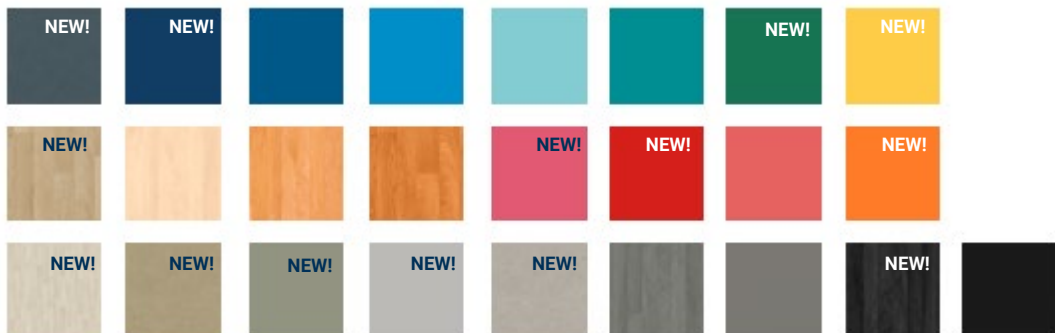

- **P1 level shock absorption $\geq 25\%$**
- **Exceptional resistance to point loads $\leq 0.10\text{mm}$**
- **Easy and cost-effective maintenance**
- **Convenient and sustainable installation with GreenLay™ exclusive method**

Roll:
2 x 20.5ml

Thickness :
6.2mm

25 DESIGNS AVAILABLE

Omnisports Reference Multi-use (6.2mm) combines the performance required for multi-sport practice with static and rolling load resistance.

Omnisports Reference Multi-use is classified **P1** according to EN 14904 with a **shock absorption of more than 25%**. This range has exceptional resistance to static loads (chairs, tables, bleachers, etc.) with an indentation performance of less than **0.10 mm** and is therefore an ideal choice for **versatile use**.

This collection benefits from our brand's **exclusive X3LT – Extreme 3 Layers Technology**, a **winning combination** of our **best features for unrivaled sports experience**.

The **XCS high-quality expanded cellular cushion** combined with our **durable resilient calendared layer** and **extremely tough fiberglass veil** provides **improved sports performance** and a **higher resistance to rolling and static loads** than competitor systems.

Omnisports Reference Multi-use comes with our **trade marketed Top Clean XP™** surface treatment, for increased durability and cost-effective maintenance. Installation options include our **GreenLay™ exclusive method, with only 2% of the surface glued: convenient, fast & sustainable**.

Omnisports Reference Multi-use is **recyclable** and clean waste from installation and post-use* material can be collected, recycled and reintroduced into vinyl flooring production through the **Tarkett ReStart®** program.

Omnisports Reference Multi-use is **phthalate-free, biocide-free**, with **extremely low VOC emissions rate <10µg/m³** to preserve **athletes' health and well-being**.

It comes with a **15-year warranty**.

RECOMMENDED APPLICATIONS

Multisports : basketball, volley-ball, handball, badminton, futsal...
and extra-sportive events : exams, elections, public meetings, associative meetings...

* With GreenLay™ installation
