DROPZONE COMFORT Rubber rolls

Dropzone Comfort (8.0mm) is a **versatile solution** for rubber floorings dedicated to strength, cardio and weight rooms. It has **excellent durability** and **high resistance to mechanical wear** thanks to a **first class choice of raw materials** and high traction properties.

Dropzone Comfort (8.0mm) is a **technically advanced pre-fabricated double-layer system**. The top layer is made from fine-grain EPDM granules and the elastic bottom layer is made from recycled rubber granules.

Dropzone Comfort (8.0mm) is an **ergonomic solution** that provides **extreme comfort**. It helps contribute to the **protection of athletes muscles and joints** during various types of workouts.

It offers **maximum resistance of 40kg*** to falling weights from a height of 2m and **acoustic reduction of 18dB**.

Dropzone Comfort has A+ emission rate and comes with a **3-year warranty**.
